Summary

Recent data science graduate specializing in statistical analysis and machine learning. Experienced in Python programming and data visualization with Matplotlib. Proven problem-solving capabilities and strong communication skills foster teamwork. Seeking entry-level positions to utilize skills for business growth.

Skills

- Deep learning and machine learning
- Computer vision
- Natural language processing
- Full Stack web-developer
- Time series analysis
- HTML and Python programming
- SQL database management
- Next js, React js, Fast API, Prisma (White Coding)

Experience

Data Analyst Trainer | Bangalore, India

Guardians EdTech

09/2025 - current

Accomplished Data Analytics Instructor specializing in Excel, SQL, Python, and advanced BI tools. Experienced in conducting workshops, creating curriculum, and training learners in applied statistics, probability distributions, machine learning basics, and visualization. Focused on delivering real-world insights, empowering professionals to leverage data for strategic decision-making. Recognized for interactive teaching style and practical training approach.

Data Science Trainer | Bangalore, India

ISBR Business School

03/2025 - Current

I have conducted comprehensive training sessions and workshops on fundamental machine learning concepts, algorithms, and tools for both students and professionals. Designed a hands-on curriculum covering supervised/unsupervised learning, deep learning, data preprocessing, model evaluation, and deployment. I provided mentorship to learners on practical machine learning projects, utilising Python, scikit-learn, TensorFlow, and cloud platforms.

Ion Idea

Software Delivery Processes Intern

06/2023 - 12/2023

- Improved software delivery efficiency by 15% by optimizing project management processes.
- Played a key role in coordinating project workflows, optimizing processes, and implementing quality assurance measures to enhance product delivery.
- Following the action words/Statements based on the client's Queries.
- Taking the action based on Immediate quires in the company via backend process.

Projects

1. JOURNAL MANAGEMENT SYSTEM | Full-Stack Developer | 2026

Built a production-ready, workflow-driven journal management system automating peer review for academic publishers. Designed and implemented 5 autonomous agents handling submission acknowledgement, format validation, reviewer suggestion, secure link generation, and multi-channel notifications (Email + WhatsApp).

Key Achievements:

- Automated peer review workflow reduced editorial processing time by an estimated 60%
- Integrated 3 external APIs: ORCID (reviewer identity), OpenAlex (reviewer suggestion), Twilio WhatsApp Business (real-time alerts)
- Implemented secure, expiring review links with token-based authentication (no login required for reviewers)
- Built auto-format validation checking PDF/A compliance, abstract length, ORCID presence, and plagiarism score (iThenticate API)
- Designed database schema with 12+ tables supporting submissions, reviews, assignments, and notification logging
- Developed dual notification system (Email + WhatsApp) for instant editorial team alerts

Tech Stack: Laravel / Django | PostgreSQL | Redis | Twilio API | ORCID API | OpenAlex API | Bootstrap/Tailwind | Deployed on AWS (EC2 + RDS + SQS)

Education and Training

Hindustan Institute of Technology and Science | Chennai

Ph.D. in Mathematics with Data Science

15/2026

Reva University | Bangalore

Master of Science in Mathematics

01/2022

Sri Vidya Mandir Arts & Science College | Krishnagiri

Bachelor of Science in Mathematics

01/2020

Certifications

- IBM Certified on ML, IT Vedant, Bangalore
- Deep Learning, IT Vedant, Bangalore
- Natural Language Processing, IT Vedant, Bangalore

Dr. T.A.LOURDUSAMY INNOVATION AWARD

Developed a lower gastrointestinal classification model using machine learning algorithms for accurate disease diagnosis and treatment recommendations
